PKF FI SOLUTIONS RELY ON VALUTICO TO:

Incorporate time-consuming methods such as the Leveraged Buy-Out (LBO) approach in their workflow.

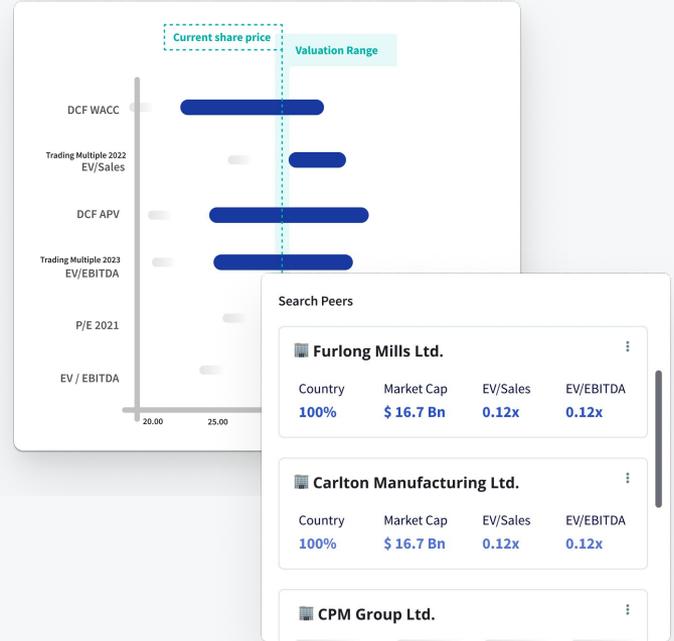

Eliminate the risk of data entry errors typical of tedious Excel-based processes.

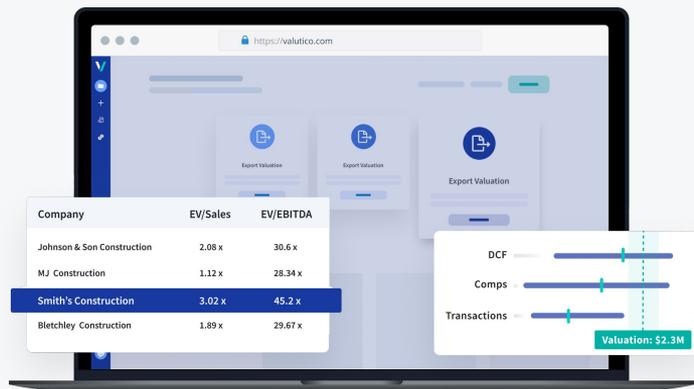

Increase productivity by automating the creation of presentations and deliverables.

As the valuation calculation system is fully integrated and controlled, it removes the possibility of error.

PKF Fi Solutions highly value the fast accessibility of data integrated in the platform.
